

# CBM Kids: Now You Know Guide

## How To Make Animal Masks

### WHAT WILL YOU NEED?

Supplies: Paper plates, Scissors, Glue, Computer paper, String, and Markers/ Crayons / Colored pencils (Extras: Glitter, Rubber bands, Feathers, Jewels and Glitter)

### WHAT DO I DO NOW?

**TIGER MASK:** Mark the places where your eyes and mouth will be. To measure, hold up the mask to your face and mark the spots where your eyes are

1. **Draw and cut the eyes:** Draw two big circles for your tiger's eyes, then fold the paper in half and carefully make a little cut on the top and bottom of the eye. That will make it easier to slide the scissors underneath and cut out the eyes

2. **Draw and cut the mouth:** For the mouth of the tiger you want to start by drawing a little hill where the nose will be. Then you want to draw a line down each side to connect it, so it will be a non-pointed triangle. Next add a smile, and connect a line halfway down the middle of the nose. To finish, make two half circles connecting from the line to the smile. Fold in half and cut them in the same way you cut the eyes out.

3. **Now you decorate your mask however you like!!:** You can make a white and black tiger, a happy tiger, an orange tiger or even a rainbow tiger. Creativity is at your

fingertips. Lastly, punch in holes on the side and tie a string onto each hole and play away!!!!

**BEAR MASK:** Mark the places where your eyes and mouth will be. To measure, hold up the mask to your face and mark the spots where your eyes are.

- 1. Draw and cut the eyes:** Draw two big circles for your bear's eyes and to cut them out by folding the paper in half and carefully making little cuts on the top and bottom of the eye. That will make it easier to slide the scissors underneath and cut out the eyes.
- 2. Cut the nose and mouth:** You're going to use one of the eyes that you cut out or you can cut a circle from a different piece of paper if you do not like the ones you have. And the mouth is just an open smile.

**3. Draw and cut the ears:** You want your ears to be half circles and you can use another paper plate or computer paper to cut out the ears. First you're going to take a piece of a paper draw a circle, cut the circle out than open the circle and cut it in half.

**4. Color it in:** You're going to want to start coloring your mask. You want to color the ears and nose before they get glued on

- 5. Glue it:** You are going to want to glue on the ears and nose and let it dry. Make sure you punch holes in the side, tie a piece of string to each hole, tie your mask up and have fun!!
